Microsoft should pay damages to companies that were crushed in unlawful acts.

1. I think a fair settlement would be for the US govt. to stop using microsoft products in a stance for the right and lawful thing to do. Use some sort of open source software. APPLE OSX would be a safer and cheaper option for our govt.

2. Make microsoft pay 5 billion cash to the schools of this country for their own choice of use for technology. Suggest they buy apple products instead.

This would be a fair punishment. It would open the door for competition and the most monopolized company a chance to compete on a level playing field.
